

1. The first step is to identify the problem. This involves understanding the current situation and the goals that need to be achieved. Once the problem is identified, the next step is to develop a plan. This plan should outline the steps that need to be taken to solve the problem. Once the plan is developed, the next step is to implement the plan. This involves putting the plan into action and monitoring the progress. Finally, the last step is to evaluate the results. This involves assessing the outcomes of the plan and determining if the goals have been achieved.
