

GoSoapBox is a Bring Your Own Device (BYOD) Student Response System where students use wi-fi enabled devices on campus to interact online with their lecturer and peers before, during or after a face-to-face class. The tool promotes student engagement in an active learning approach. It has features where students can indicate their level of understanding through the Confusion Barometer; and lecturers can create quizzes and polls, discussion topics/questions. All data can be exported by the lecturer for later analysis and response. GoSoapBox is compatible with a variety of mobile devices such as laptop computers, tablets and smartphones.

- A. Sign up for an account by visiting <https://app.gosoapbox.com/signup/teacher/jamescook>. Enter your name, email address and password (In line with the JCU Internet security policy, please DO NOT use your JCU password!)
- B. Sign in to your account at <https://app.gosoapbox.com/auth/login>
- C. Create an event by clicking the **Create** button next to the **Your Events** heading.
- D. Give the event a name (e.g. NS1234 Week 2 Lecture) and click **Create**.
